EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with applicant's representative, Mr. Andrew Wliford, on 11/28/05.

The application has been amended as follows:

Claims 11-15 have been cancelled.

The following is an examiner's statement of reasons for allowance: the claims disclose a method for cutting of a piece of elongated web wherein a gripper is displaced in order to pull the web through open upstream and downstream clamp parts, then the upstream clamp parts are closed on the web and the web is cut upstream of these clamp parts, after which the gripper is displaced upstream again in order to create a dependent loop which is then clamped by the downstream clamp parts wherein the lower clamp of the downstream clamp part moves simultaneously upstream and upward, then the loop is transported horizontally. Reinders (6,601,489) teaches cutting a web comprising the sequential steps of feeding a web coming from a supply roll, the web being pulled between two sets of clamp parts, clamping the clamp parts, then cutting the web which has a dependent loop, and finally transporting the loop horizontally, but does not teach clamping the upstream clamp parts, cutting through the web, then moving the

gripper upstream to form the loop, then closing the downstream clamps via the lower downstream clamp moving upstream and upward simultaneously before transporting the loop horizontally. Burton et al (4,271,767) teaches cutting a web comprising the sequential steps of feeding a web coming from a supply roll, the web being pulled between two sets of clamp parts, clamping the clamp parts, then cutting the web which has a dependent loop, and finally transporting the loop horizontally, but does not teach clamping the upstream clamp parts, cutting through the web, then moving the gripper upstream to form the loop, then closing the downstream clamps via the lower downstream clamp moving upstream and upward simultaneously before transporting the loop horizontally. It would not have been obvious to combine the references with other prior art teachings in order to meet the claim limitations.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Isaac Hamilton whose telephone number is 571-272-4509. The examiner can normally be reached on Monday through Friday between 8am and 5pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Allan N. Shoap can be reached on 571-272-4514. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
